

What is the Trinity? There are arguments claiming that this originated from paganism. They would display pictures and artifacts showing that the heathen worshipped a Triune god, which supposedly proves it to be idolatrous. On the other hand, the word of God says there truly is a Trinity. Some would criticize that there is no such term to be found in the entire Bible at all. Although the term may not be, the idea is definitely revealed in numerous verses. This study will answer questions such as, "If the word 'Trinity' is not in the Bible, then didn't someone made that idea up?" "How can three different 'Gods' be really one God?" "If the Holy Spirit is subservient to Jesus, then how can they be truly the same God?" "If Jesus is subservient to the Father, then how can they be truly the same God?" "Are there verses clearly showing that God refers Himself to the plural sense, not singular?" "If the word 'Trinity' is not in the Bible, then what word does the Bible use to show that idea?" "How can I understand this confusing concept of three people being one?"
